Dear Sirs / Madams

## **CS NOTICE: CHANGES TO ISN MARKERS**

We are pleased to announce that Survey Services will be issuing ISN markers with an improved design after the 16xxx series are completely allocated. These new markers are in the 17xxx series.

2 In our continuous strive to serve you better and following feedback from you, we have incorporated the following improvements that you need to take note of when you are allocated the new series of ISN markers:

(a) Reduced component count from three previously, to two, consisting of a circular disk, engraved with the ISN marker number and a fastener, for anchoring the disk onto concrete surfaces;

(b) More durable material in the form of stainless steel is used for the circular disks;

(c) Tamper proof fasteners are used for permanent anchoring of the circular disks onto concrete surfaces. This reduces the possibility of unauthorised removal and destruction of ISN markers.

3 A drill bit with a diameter of 6.5 millimetres is required to obtain a correct hole size to insert the new fastener.

4 The new markers have successfully undergone field tests. They are much easier to install than the previous batches of ISN markers. Kindly contact us should you require our assistance on this matter.

Yours faithfully
